Michael,

We are going to send out an invoice for the hauls last week today or tomorrow. Could you tell me who I should invoice? Their were a total of 4 loads of between 4500 and 10800 gallons each and we are going to bill them at \$0.50 per gallon. We were also going to be billed 10 cents per gallon by the digester that received the glycerin. Can I please add 10 cents per gallon to the glycerin loads? Whole Energy made no income off of these loads but I would still like to cover all my costs.

Irregardless I am glad we were able to save OPDA some money as a result of our involvement.

Regards, Atul

Hello Atul

I have a couple question for you, why can't you use the methanol in your business process?

Second, why does the methanol need to be 99.5 % pure for any other buyers to use? This seems very excessive when the product has been determined to be at least 99% pure.

Also just so you know I have to verify with either my EPA RCRA disposal folks or the WDOE that the facility that you recommending to take the methanol to is approved.

So we may have to push back the pickup date to Monday. Let me know what you think.
